The screenshot shows the Eclipse IDE with a Java file named `TestLogin.java` and a console window. The console output indicates that TestNG version 7.4.0 was detected, and a warning was issued about the CDP version (120) not matching the requested version (121). The test results show that the `performLogin` method passed successfully.

```
1 package com.cr
2
3 import org.op
7
8 public class TestLogin {
9
10     @Test
11     public void performLogin() {
12         // WebDriver
13         // System.out.println("Performing Login");
14         // driver
15         // driver
16
17         // driver
18         // System.out.println("Performing Login");
19
20         // driver
21         // driver
22         // driver
23         // System.out.println("Performing Login");
24         // System.out.println("Performing Login");
25     }
26 }
```

Console Output:

```
<terminated> TestLogin [TestNG] D:\eclipse-java-2023-06-R-win32-x86_64\plugins\org.eclipse.justj.openjdk.hotspot.jre.full.win32.x86_64_17.0.9.v20231028-0858\jre\bin\javaw.exe
